Transportation Master Plan – Community Survey

Copperas Cove, Texas – The City of Copperas Cove, with the assistance of Lockwood, Andrews & Newnam, Inc. (LAN) engineering firm, is developing a new Transportation Master Plan. As the region's population continues to grow, transportation issues will become increasingly important and complex. The effort is meant to lay out framework for how the City will spend money and make decisions on roads, sidewalks, trails, and transit over the next decade. Developing a comprehensive plan will promote efficient use of future funding and resources with the goal of achieving an improved and sustainable transportation future. Participation by the public and municipal officials is critical to developing a relevant plan.

A survey has been launched in effort to gain input from the citizens operating in and around our community. Information from the survey will assist in the preparation of graphs, maps and presentations. The survey can be located on the homepage of the City's website at www.copperascovetx.gov or at <https://www.surveymonkey.com/r/6HGYQG7>. The on-line survey takes just a few short minutes to complete.

Any questions or concerns regarding the Transportation Master Plan or survey should be directed to Public Information Officer Kevin Keller at kkeller@copperascovetx.gov or (254)547-4221.
