“The City Built for Family Living”

Fire Department

March 6, 2020

The City is monitoring information on Coronavirus (COVID-19) being disseminated from various agencies such as the Centers for Disease Control and Prevention (CDC), public health and emergency management. The CDC has published guidance on how to prepare and take action for COVID-19, which may be found here: <https://www.cdc.gov/coronavirus/2019-ncov/community/index.html> The guidance published by the CDC is universally applicable to most communicable diseases. The CDC recommends individuals practice everyday prevention measures like frequent hand washing, stay home when sick and cover coughs and sneezes.

All City departments are appraising protocols for continuity of operations. As a medical provider, Copperas Cove EMS responses will follow guidelines from the CDC, the Texas Department of State Health Services, and our emergency services policies.

The City has not been notified of suspected or confirmed cases of Coronavirus infections in Central Texas. Citizens are encouraged to not panic in any situation, continue good personal and family hygiene practices, monitor official government communications and media reports, and continue with normal daily activities until otherwise notified.

Stay Safe;

Gary D. Young  
Deputy Fire Chief | Emergency Management Coordinator
