### **Coronavirus (COVID-19) Vaccine Interest Survey**

Vaccine to protect persons from Coronavirus (COVID-19) has been manufactured and is beginning to be administered in our area.

So that the Emergency Management team can plan accordingly and support COVID-19 vaccine administration in our community we need to gather your input.

Simply stated we would like to know if you would like to receive the vaccine. While receiving the vaccine is a personal choice and is optional, we still need to know who does want to receive it so that we can work hard to get enough vaccine into our community.

While the City of Copperas Cove does not directly plan to administer vaccines, we will be working with our Federal, State and Local partners who are involved in getting COVID-19 vaccine to those who desire to be vaccinated.

Participating in this survey does not guarantee that you will receive the vaccine, it is merely a tool that is being used to collect important data.

If you have already received the vaccine (1 or 2 doses) or do NOT desire to receive the vaccine then please do not participate in this survey.

Please complete one survey per person. The survey may be found here:

<https://www.copperascovetx.gov/pio/covid-19/>

As vaccine becomes available in our community, the City of Copperas Cove will work to share that availability with citizens so that appointments can be made with health care providers who have the vaccine.

Sincerely;

Gary D. Young  
Deputy Fire Chief|Emergency Management Coordinator
