

WATER DISTRIBUTION UPDATES, PLEASE SHARE

1. City water is flowing throughout the main lines. If you have no water it is most likely you have internal freezing in your lines. The City's recommendation is that your meter remain on and your faucets are open, as the pressure in the main line will help speed up the thawing process. If busted pipes are experienced and the leak cannot be isolated, Water Distribution can attempt to prioritize and turn water off at the meter. For extreme circumstances only, you may call (254) 547-8222 opt. 1 or (254) 547-0751 to request on-call personnel.

2. We are experiencing extremely low pressure on the Mountain Top (Veterans, Skyline, Freedom and surrounding area) and Turkey Run (Turkey Creek Area) Pressure Plains. What does this mean? Water is still flowing, however ever so slowly in some areas. Some residents may have water, while others may not.

3. NO Boil Water Notices have been issued for our City as of this time.
