Update Tornado Recovery Cleanup efforts.

Copperas Cove, Texas- The cleanup efforts continue after the June 09, 2019 EF-02 Tornado. Significant progress has been made, and the City will continue to move forward to aide in cleanup efforts. Resources, manpower, and collection trucks have been devoted to the affected area to assist in the cleanup. In addition, neighboring cities, as well as other City departments, are providing manpower and equipment to expedite with the removal of shrubbery and branches.

Today, June 17, 2019 will be the last day of free "Bulk Pick Up" to the affected area from the June 9, 2019 tornado. Due to the large number of branches and brush in the area, however, the City will be extending free pick up to the affected area through Friday June 21, 2019.

The City Transfer Station will accept brush and branches from residents of the affected area through Friday June 28, 2019. Proof of residency will be required when the items are discarded to qualify for free disposal.

We truly appreciate your patience during these challenging times.
